Cash Flow Forecast Dashboard

Base case · Best case · Worst case scenario analysis — Apr to Sep (forecast period)

Overview

Scenario Comparison

Monthly Detail

Executive Summary

PURPOSE

This cash flow forecasting model analyzes monthly liquidity position and identifies potential cash surplus or deficit under Base, Best, and Worst case scenarios.

KEY FINDINGS — BASE CASE

- Monthly cash flow remains positive for most periods
- October shows negative net cash flow due to higher outflows
- January reflects the strongest liquidity position
- June shows a thin cash buffer and needs monitoring

RISK ANALYSIS

- Cash deficit risk arises if inflows slow and expenses increase
- Worst case scenario indicates possible cash stress in September
- Sustained negative cash flow may require external funding or cost control

RECOMMENDATIONS

- Improve cash collections in low-inflow months
- Control discretionary expenses during risky periods
- Maintain a minimum cash buffer for operational safety
- Regularly update assumptions for accurate forecasting

HOW TO READ EACH KPI

Lowest Cash Balance

Pulled from worst case sheet — shows maximum risk point

Risk Month

Month where cash is lowest

Cash Buffer Status

Above 50,000 = Healthy · 20,000–50,000 = Watch · Below 20,000 = Critical
