

Cash Flow Forecasting Dashboard

Project Overview

This project is a complete Cash Flow Forecasting solution developed using Microsoft Excel and Power BI. It helps businesses forecast future cash positions, monitor liquidity, compare multiple scenarios, and support financial planning and decision-making.

The model combines historical cash flow data with forecasting assumptions to estimate future cash balances under different business conditions.

Project Objectives

- Forecast future cash inflows and outflows
 - Monitor monthly cash balances
 - Identify potential cash shortages
 - Compare Best, Base, and Worst Case scenarios
 - Support finance teams with cash planning and liquidity management
-

Features

Excel Financial Model

- Historical cash flow analysis
- Monthly cash inflow and outflow forecasting
- Opening and closing cash balance calculation
- Net cash flow analysis
- Dynamic formulas
- Scenario assumptions

Power BI Dashboard

- Interactive KPI cards
- Monthly cash flow trends
- Cash balance visualization
- Inflow vs Outflow comparison
- Scenario comparison dashboard

- Executive summary page

Scenario Analysis

- Best Case
- Base Case
- Worst Case

Key Performance Indicators (KPIs)

- Closing Cash Balance
 - Lowest Cash Balance
 - Cash Buffer Status
 - Risk Month
 - Net Cash Flow
 - Monthly Liquidity Position
-

Tools & Technologies

- Microsoft Excel
 - Power BI
 - Power Query
 - DAX
 - Financial Forecasting
 - Cash Flow Analysis
 - Scenario Planning
-

Dashboard Pages

1. Overview

- Closing Cash Balance
- Cash Buffer Status
- Inflow vs Outflow
- Net Cash Flow
- Cash Trend

2. Scenario Comparison

- Best Case
- Base Case
- Worst Case
- Forecast Comparison

3. Monthly Details

- Monthly Cash Flow
- Opening Balance
- Closing Balance
- Monthly Observations

4. Executive Summary

- Key Findings
- Risk Analysis
- Recommendations

Business Value

This dashboard helps finance professionals to:

- Improve cash flow visibility
- Detect liquidity risks early
- Support budgeting and forecasting
- Enhance financial planning
- Enable better decision-making

Skills Demonstrated

- Financial Modeling
- Cash Flow Forecasting
- FP&A Concepts
- Excel Automation
- Dashboard Design
- Power BI Development
- Data Visualization
- Financial Analysis
- Scenario Modeling

Future Improvements

- Automated data refresh
 - Integration with ERP systems
 - Rolling 12-month forecast
 - Variance analysis
 - Working capital forecasting
 - AI-based cash flow prediction
-

Files Included

- Excel Financial Model
 - Power BI Dashboard (.pbix)
 - Dashboard Screenshots
 - HTML Interactive Dashboard
 - Project Documentation
 - README.md
-
